SILKSCREEN PRINT/ TEXTILE PRINTING

For silkscreen print, a screen is made impermeable in areas not to be printed through a photochemical process. The promotional item is placed under the screen and printed on the areas where the screen is permeable. The colour is pushed through the holes and applied to the product. When using coloured logos it is recommended to add a white base coat to ensure brilliant colours. This method is ideal for flat surfaces, such as textiles or segments of umbrellas.

LASER ENGRAVING

A method using a laser beam to engrave a logo into nearly any material. A computer controlled process ensures a pinpoint reproduction. The final result is always dependant on the material surface. A colour replica is not possible.

EMBOSSING

A stamp is used to press a logo into the surface of an article. Coloured and metal-looking (in gold and silver) embossing are possible through special foils. This technique is mostly used on leather and synthetic leather products.

ETCHING

An electrolytic process – a piece of felt is soaked in corrosive liquid and is pressed through a stencil onto the product. Once the liquid comes into contact with the article the desired imprint is etched into the surface. The advantage is that the imprint is very robust.

DIRECT PRINT

With direct print, single drops of ink are fired through nozzles directly onto the item or paper (similar to an inkjet printer). Normally, colours that dry with UV light are used for high brilliance. Suitable for low quantity and flat items.

TAMPON PRINT

A template of the logo is made and filled with the desired colour of ink. Then the colour is transferred directly onto the article with a silicone pad. As this pad is made of flexible silicone, almost all surfaces can be printed – including uneven surfaces.

EMBROIDERY

A digitally controlled process in which a computer steers a needle and thread to embroider a surface. As many as 10 colours can be used in one embroidery procedure. This robust form of refinement can be used on all textiles. The logo must be provided in order to determine the number of stitches and perform an accurate cost calculation.

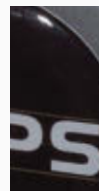

TRANSFER PRINT

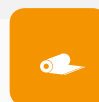

A heat press, consisting of a heating plate and base plate, is used to apply the logo/ picture/ text, pre-printed on thermal paper, onto the item. Beforehand, the thermal paper was imprinted through silkscreen or digital print.

DOMING

The doming sticker is made of synthetic resin and a sticker with the company logo. The clear resin is fitted precisely to the logo print, protects the print and gives the logo a 3D effect. The convex sticker is perfect for advertising on rough or hard materials, such as umbrella handle.

DIGITAL TRANSFER

Digital transfer works in two steps. First, a special thermo paper is imprinted digitally (see passage „direct print“) and cut to size. In a second step, the logo / picture / text is then printed onto the product under pressure in a heat press.

IDEAS FOR EXCELLENCE

Write away For all indescribable moments!

In the age of e-mails and WhatsApp a hand written letter is a bit out of fashion. Nevertheless, nothing is more enjoyable than closing a successful contract with own handwritten signature. Whether it is a ballpoint pen, a fountain pen, or a rollerball pen - it can tell you a lot about its owner. In a critical moment, you should therefore choose a writing instrument that you can rely on.

We pay great attention to create sparkling personality for our picopens, so you and your customers could stand out while leaving a mark. Let yourself be charmed by our complimentary pens!

Brilliant performance Shown in the best light!

Let it shine. Our LED lights do not only look good, in terms of light output they are really small power packs. Reading light, solar lantern or flashlight ensure optimum illumination, wherever it is needed. The LEDs make it possible. In contrast to the light bulbs they are also much less sensitive to vibrations.

We from PiCOWORLD are specialised in bringing good things to light. You and your clients will be absolutely thrilled by the multifunctional picolux ideas!
